DETAILED ACTION

1. This is a response to the amendment and remarks/arguments filed on 10/10/2006.
2. Claims 1-9 are pending.

Allowable Subject Matter

3. The allowable Subject matter was indicated in office Action mailed on 06/08/2006.

The following is a statement of reasons for the indication of allowable subject matter: No prior art found by the examiner that suggested modification or combination with the cited art so as to satisfy the combination of all the limitations in claims 1-9.

As claim 1, the prior art of record taken along or in combination, fails to disclose or render obvious "... the voltage adjusting unit is employed such that the voltage across the capacitor is kept substantially unchanged regardless of the output power level of the laser light source." in combination with the rest of the limitations of claim 1.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dong (U.S. Patent No. 5,923,427) discloses an optical triangulation distance sensing system and method using a position sensitive detector and an automatic power controlled light source. Looper (U.S. Patent No. 4,095,098) discloses a ratiometric transparency meter using light voltage counter. Wani et al. (U.S. Patent No. 5,134,273) discloses controlling output energy of a pulsed light source comprising a gas discharge laser.
